NCCCP

Program Overview

The design and monitoring cycle is a road map to assist an NSF in moving its coach training and certification program toward a competency-based approach. This road map was developed based on the experiences of several pilot sports.

Summary

The NCCCP evaluation project, conducted from 1994-96, recommended that the NCCCP transition to a competency-based approach. A major re-development of the program began in 1997. The elements that formed the cornerstones of the new program included a new classification of coaches, updated teaching methods and coach evaluation.

Key improvements that are being made include:

- placing a greater emphasis on coach abilities; certification will be based on a proven ability **to do** versus simply **to know**.
- a structure for the program that is able to accommodate differences between sports, types of coaches, and environments in which coaches work.
- coach training and certification that is based on participant needs and that is as experiential as possible.

Definition of NCCCP Certification

Certification is a designation given to a coach who has achieved and/or demonstrated coaching performance to a certain set of standards. To be certified within the NCCCP, a coach must show that he/she is able to:

- perform a particular job or accomplish a series of tasks deemed important and relevant to his or her sport and to the type of certification he or she is seeking within the NCCCP structure
- do so within a particular framework of ethical practice.

To be certified, a coach must accept and agree to comply with the NCCCP Code of Conduct (or Code of Ethics).

A new structure for the NCCCP

The NCCCP is in the process of changing from its current structure with five levels (1 to 5) and three components (Theory, Technical, and Practical) to a new structure that is based on the specific context in which coaches generally work in Canada.

THE NEW NCCCP STRUCTURE

Community Sport	Competition	Instruction
- Initiation - Ongoing participation	- Introduction - Development - High performance	- Beginners - Intermediate performers - Advanced performers

What must a coach be able to do?

Within each context, coaching outcomes are defined by the NSF that clearly outline what the coach must be able to do in order to meet the need of participants in that context.

The following table highlights coaching outcomes that must be evaluated, in a given context, for certification purposes.

Context	Outcome	Analyze Performance	Plan a Practice	Plan Sport Program	Support Athlete in Training	Support Comp. Experience	Manage Prog.	Make Ethical Decisions
Instruction - Beginner		x			x			x
Instruction - Intermediate		x	x		x		x	x
Instruction - Advanced		x	x		x		x	x
Competition - Introduction	plus any 2 others				x			x
Competition - Development		x	x	x	x	x	x	x
Competition - High Performance		x	x	x	x	x	x	x
Community Sport - Initiation								
Community Sport - Ongoing								

Program Approval Process

Formal approval of NSF programs will follow a successful review by a committee of three comprising:

- one CAC consultant not involved in the creation of the curriculum
- one outside expert named by the NSF community
- one outside expert named by Planning and Evaluation Committee (PEC) representing the learning facilitators-academic community.

NSF program approval is on a context by context basis.

Database

The new NCCCP data base tracks the progress of the coach in achieving designated coaching outcomes.

1. NCCP Overview

- 1.1. C5PBA will develop new coach training programs under the National Coach Certification Program (NCCP). Concurrently it has entered into a planning process to develop a plan for Long Term Athlete Development (LTAD). These two initiatives will be integrated to provide a world-class program for developing coaches, instructors and participants to their maximum potential.
- 1.2. The NCCP is a program that helps coaches and instructors develop abilities in certain coaching contexts that are defined by the people who participate in 5-pin bowling in Canada.
- 1.3. **C5PBA - NCCP operations committee (steering committee)**
 - 1.3.1. The C5PBA - NCCP operations committee shall oversee and guide the implementation of the NCCP. During the initial development of NCCP and LTAD the C5PBA Technical committee will act as the NCCP operations committee. (The structure of committees must align C5PBA current operational structure)
 - 1.3.2. The NCCP operations committee is comprised of
 - 1.3.2.1. C5PBA Chairman
 - 1.3.2.2. NCCP Contractor
 - 1.3.2.3. C5PBA Executive Member or Staff Member
 - 1.3.2.4. 3 Committee members at large
 - 1.3.3. All geographic regions identified below are best represented by the committee:
 - 1.3.3.1. Maritime Provinces
 - 1.3.3.2. Quebec
 - 1.3.3.3. Ontario
 - 1.3.3.4. Prairies (Sask / Alberta) or Northern Territories
 - 1.3.3.5. British Columbia or Northern Territories
 - 1.3.4. The NCCP operations committees mandate is to:
 - 1.3.4.1 Facilitate development of NCCP in all coaching contexts
 - 1.3.4.2 Facilitate the implementation of NCCP context throughout Canada
 - 1.3.4.3 Monitor and enable quality in delivery of NCCP
 - 1.3.4.4 Grant and maintain certification
- 1.4. **Participant Development Model**
 - 1.4.1 In 5-pin bowling there are clearly 2 streams in which participants engage in the Sport, Community sport and Competitive Coach
 - 1.4.1.1. The Community stream introduces the basics of 5-pin bowling in a fun, safe and self-esteemed environment
 - 1.4.1.2. The Competitive stream is for athletes in the Competition stream pathway with an aim to at a higher level
- 1.5. **Coach Development Model**
 - 1.5.1.1. Based on C5PBA's CDM, coach education will be developed in two coaching contexts. (Appendix F)
 - 1.5.1.2. Community Sport Initiation for Instruction Beginners
 - 1.5.1.3. Coach - Competitive Introduction
 - 1.5.1.4. In 5-pin bowling a coach must be Trained in the Community Coach context before becoming Certified in the Competitive Coach context

1.6 Accreditation Status

Glossary of Terms

Assessment: A step of the learning process whereby the learner is informed of his or her performance or progress towards the achievement of a given outcome.

Certification: The recognition by the NCCP, following a successful evaluation, that context-specific coaching outcomes have been demonstrated to an acceptable standard.

Coach Certification number (cc#): The number registered to a coach in the NCCP Database.

Coach Development Model (CDM): Design of the CDM follows the completion and validation of the PDM. The purpose of the CDM is to: Determine the types of coaches the sport needs given the information provided in the PDM; Articulate the structure of the NCCP based on the above, consistent with the general Streams and Contexts framework of the NCCP; Identify which environments/milieus have the same coaching needs, and therefore could/should be linked to a specific set of coach certification program; Determine the entry points, prerequisites, and possible movements of coaches within the structure; Identify the need for and types of gradations that could/should apply within a given coaching context of the NSO's coaching development structure, to recognize competence above and beyond minimum certification requirements.

Coach Workbook: The workbook provided to a coach during an NCCP training session that gives the coach an opportunity to document their findings while engaged in the instructional design outlined in the workbook. It is used to facilitate the training of outcomes and criteria.

Coaching: The human interaction process whereby, through selected ethical practices, one person helps another to become better and to progress in a certain endeavour.

Competency: The integration of knowledge, skills, and attitude that confers the ability to act, judge, or decide appropriately in a given context. The five competencies identified for the NCCP are Critical Thinking, Interaction, Leadership, Problem Solving, and Valuing.

Competition: The activity of doing something with the goal of outperforming others or winning something.

Conditional Approval: The Validation of a sport context program by an expert panel that identifies the achievement of current NCCP program standards. Conditional approval reflects that the majority of requirements have been met, but that the program is not yet entirely available in both official languages, and that some minor adjustments may still be required.

Context: The specific characteristics of sport programs and activities that determine the needs of participants. The context is determined by variables such as participants' age and proficiency level, the primary reasons for being involved in sport, the nature of the program they are involved in (duration of typical sessions, frequency of sessions/contact with the coach, duration of the program/season), and the environment in which the sport experience takes place (club, school, community league, high performance centre, etc.).

Criteria (plural) / Criterion (Singular): Identifies what is evaluated within a given outcome and describes desirable <the scope of> coaching characteristics or behaviours. Criteria are used as triggers in the NCCP database to track the progress of coaches towards a given status.

Debrief: The process an Evaluator will use to continue to gather necessary information to verify specific evidences that may not have been clearly demonstrated during the practice, and to provide feedback to the candidate about what went well and what areas need improvement. To this end, the debrief should help to shape a more global appreciation of the coach's competencies based on the required outcomes and criterion.

Education: The endeavour, process, and means whereby a person can acquire the knowledge, skills, and attitude that support the achievement of selected outcomes.

Evaluation: The process whereby a judgment is made on the ability of the coach to achieve and demonstrate a series of outcomes, to the appropriate standard of performance.

Evaluator: A person who has gone through formal training to determine a coach's ability to achieve a given coaching standard.

Evidence: Identifies discrete, observable coaching behaviours that need to be verified in order to successfully evaluate a give criterion, and may infer the extent to which core competencies have been achieved.

Expert: Someone whose knowledge or skill is specialized and profound, especially as the result of much practical experience.

Feedback: Verbal or non-verbal communication that provides an individual with an observer's opinion of their performance.

Final Approval: The validation of a sport context program that indicates when all program standards have been achieved based on requirements outlined in the Conditional Approval documents; and that the program is available for full implementation in both official languages across Canada.

Knowledge: An understanding of the related theories and concepts one must have in order to accomplish the tasks.

Learning Facilitator Guide: The document that details the instructional design process and learning activities that a Learning Facilitator is expected to facilitate.

Learning Facilitator: A person who has gone through formal training that enables an ability to provide support to coaches in training workshops.

Learning: The acquisition of knowledge, skills, and attitudes that lead to a permanent or enduring change in behaviour and performance.

Long term Athlete Development Model (LTAD): The Canadian 7-stage model that reflects a gradual cycle of athletes/participants participation in sport using key parameters that articulate appropriate activities and sport involvement given an individual's stage of development. Each Canadian sport is required to develop a sport-specific model in addition to the generic Canadian Sport for Life model.

Mentor: A person who can guide you towards becoming a competent coach able to contribute to the sport, the coaching profession and the community.

Minimum Standard: A policy approved by partners of the NCCP as a minimum requirement for development or delivery of the NCCP.

NCCP Registration Form: The form on which workshop/activity data and coach data is entered and then submitted either electronically or in hard copy to the NCCP Database.

Operations: Describes the administrative requirements that are necessary to deliver the National Coaching Certification Program

Outcome: The performance that the coach is expected to demonstrate for certification purposes, given the functions and tasks deemed most relevant to his or her context.

Participant Development Model (PDM): Completion of the PDM is the first major reflection a sport has to go through as part of the NCCP transition. The PDM allows the National Sport Organization to make a prospective needs analysis about the following aspects: The various groups of participants involved in their sport or in variations of their sport; The environments/milieus in which the sport is practiced and these participants found; The characteristics of the programs offered in these environments/milieus (duration, frequency of contacts, nature of contacts in terms of training/competitive opportunities, level of competition where appropriate); Given the above, the fundamental reasons why people are involved in such programs, from the following perspectives: fitness; skill; performance; social. The PDM has to be validated extensively throughout the sport, and endorsed by the Board of Directors or a similar decision-making body within the sport. The PDM provides the sport with the core information from which its coach development system should be developed.

Philosophy: General beliefs, concepts, and attitudes of an individual or group. The philosophy of the NCCP can be summarized in the following statements: (1) To provide a positive experience to all participants in sport programs; (2) To enable all participants to fulfill their potential in sport; and (3) To use sport as a vehicle to help all participants develop in a holistic manner.

Portfolio: Collection of work or other papers (in this case, evidence) which, taken as a whole, offers a picture of an individual's range of abilities. A portfolio provides evidence of a coach's readiness to engage in formal evaluation.

Problem Solving Approach (PSA): An instructional design technique that involves a cyclical approach of analysing a situation to identify a problem or being presented with a problem, determining possible solutions, cross-referencing possible solutions with research and expertise, testing possible solutions, choosing a course of action, and implementing the decision to solve the problem, and then assessing the impact of the solution applied. Also known as a Problem Posing Approach.

Professional Development: The systematic maintenance, improvement and broadening of knowledge and skills, and the development of personal qualities necessary for the execution of professional duties throughout working life.

Quality Control: The measurement of implementation results against identified program quality standards.

Reference Material: Documents provided to coaches during training that provide expert information in a specific subject or theme.

Skill: The capability of producing consistent performance or behaviour which can be improved with training or practice.

Sport-ified: A modification that increases applicability and relevance to a specific sport or to an individual within a specific sport.

Standard (of certification): The absolute level to which a given coaching outcome must be demonstrated. The standard is determined by the intrinsic demands of the outcome(s) identified, and the nature of the criteria used in the evaluation process.

Status: A designation that indicates a coach's engagement in particular outcomes and may be used to apply legislative requirements for coaching within a given sport.

Stream: A group of athletes with similar performance objectives and requirements within a continuum of ability levels, placed together.

Training: The process whereby general and specific skills and abilities are acquired and/or refined, in order to support the achievement of selected outcomes.

Training for Outcomes: Formal or experiential training intended to prepare a coach to meet specific NCCP outcomes, criteria and evidences required during the NCCP evaluation process in a given context.

Values: Deeply held beliefs.
