SUBJECT: SEMI-ANNUAL MEETING - RECOMMENDATION

As Average Book Chair for the Huronia 5 Pin Bowlers' Association, I would like to submit the following recommendation for the upcoming Semi-Annual Meeting pertaining to the Average Book program:

RECOMMENDATION

THAT THE 5-YEAR ROLLING AVERAGE BE CALCULATED USING ALL GAMES BOWLED BY A MEMBER DURING THE BOWLING SEASON VERSUS THE CALCULATION OF THE ROLLING AVERAGE BASED ON EACH MEMBERSHIP #.

Reason: In the majority of cases where members bowl in more than one league either within a Zone Association or within a D.C. Association the average is calculated based on the membership # and the total number of games and averages are used to calculate the rolling average. The exception arises when a member bowls in more than one league (where one league is within a Zone Association and the other is within a D.C. Association). This will generate two (2) membership #'s for the individual and the averages would be calculated separate thus making for two (2) entries in the average book (one for the Zone and one for the D.C. Association). Each year the averages should be calculated using all games bowled for each member during the bowling season regardless of where the member bowls (i.e. Zone Association or D.C. Association).

Yours truly,

Nancy Moore
Average Book Chair
